

**NORTH CAROLINA HIGH SCHOOL
TO COMMUNITY COLLEGE**

ARTICULATION AGREEMENT

BETWEEN THE
NORTH CAROLINA DEPARTMENT OF PUBLIC INSTRUCTION — NCDPI

AND THE
NORTH CAROLINA COMMUNITY COLLEGE SYSTEM — NCCCS

REVISED JANUARY 2005

NORTH CAROLINA

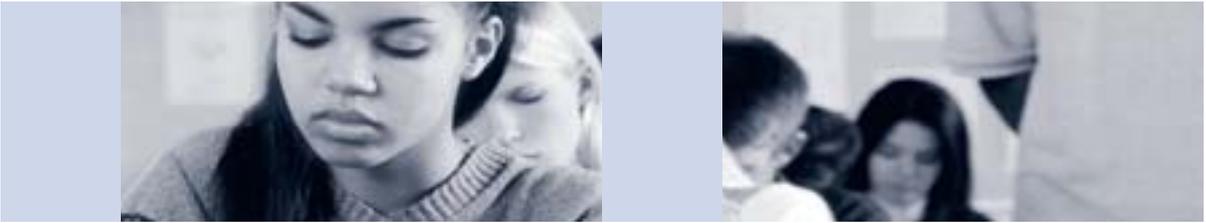

HIGH SCHOOL TO

ARTICULATION AGREEMENT

HISTORY

A statewide steering committee first met to explore articulation of credit between North Carolina’s public schools and community colleges in August 1998. This committee consisted of leaders from the community college and public school communities at both the local and state level. The committee was tasked with the determination and development of the guiding principles for the Articulation Agreement, definitions, goals, objectives, criteria, and work team structure for the Articulation Agreement.

Over the next several months, 14 curriculum work teams and three support services work teams were created to assist in the process. In order to remain in compliance with Southern Association of Colleges and Schools criteria, the curriculum work teams were composed of faculty and program specific curriculum specialists. More than 200 high school and community college faculty, curriculum specialists, counselors, registrars, and instructional administrators worked through issues related to placement tests, documentation, and evaluation. Recommendations from all of the work teams were incorporated into the articulation document. From December 1998 through August 1999, presentation and revision of draft documents of the North Carolina High School to Community College Articulation Agreement occurred with five public hearings and additional solicitation of feedback from the stakeholders. The revised Agreement was presented to and endorsed by the State Boards of Education and Community Colleges in September 1999. In November 1999, each of the 59 institutions of the North Carolina Community College System endorsed, adopted, and accepted the North Carolina High School to Community College Articulation Agreement.

This current Articulation Agreement began to evolve in late November 2003 when a Leadership Committee was convened to update the definition, goal, guiding principles, criteria, components, and evaluation process for the Statewide Articulation Agreement. This committee was composed of college presidents, chief academic officers, associate superintendents, principals, local career-technical directors, College Tech Prep coordinators, business representatives, and state-level staff from both secondary and postsecondary education.

HISTORY CONTINUED.....

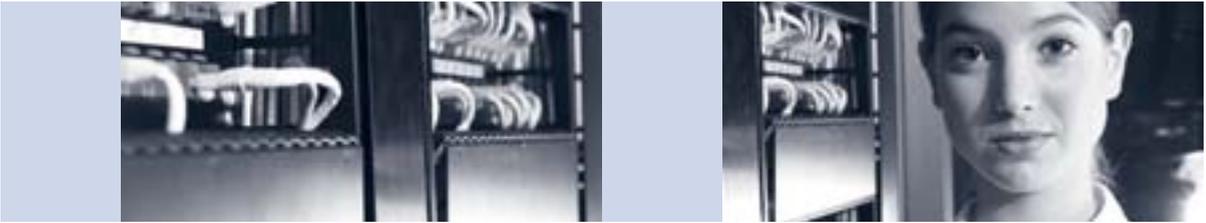

Using the Leadership Committee's recommendations and the original Articulation Agreement, curriculum staff from both the North Carolina Department of Public Instruction and the North Carolina Community College System identified potential courses in the career technical education's emerging curricula areas to be considered for articulation.

In January 2004, eleven curriculum teams, one team for each pathway, assembled to take part in the curricula review process. Each team consisted of 12 high school and community college faculty. Over 300 faculty participated. The teams reviewed course descriptions, blueprints and competencies then determined if the course was appropriate for articulation. Crucial in the approval process was significant competency match to industry regulations and licensing requirements.

Upon completion of competency and content review, recommendations for course articulation were submitted to state staff for compilation and dissemination. Four drafts were distributed and refined over the next several months. Email permitted all 58 community colleges to have direct input into this process. Final drafts were presented to North Carolina Association of Community College Instructional Administrators at their spring conference and to the North Carolina Association of Community College Presidents during their fall meeting. The President's Association endorsed the Agreement at their annual meeting in October 2004.

The NC High School to Community College Articulation Agreement was presented to, and endorsed by, the NC State Board of Community Colleges on November 19, 2004. The NC High School to Community College Articulation Agreement became effective in January 2005.

DEFINITION

Articulation is a systematic, seamless student transition process from secondary to postsecondary education that maximizes use of resources and minimizes content duplication.

GOAL

Students will make a seamless transition of identified courses from secondary to postsecondary education.

GUIDING PRINCIPLES

- A.** The statewide articulation agreement will build on the existing College Tech Prep course of study.
- B.** In selection of courses for articulation, first priority will be the North Carolina Department of Public Instruction standard course of study.
- C.** Local articulation efforts and local flexibility in responding to new and emerging areas are encouraged. This agreement shall not supersede local articulation agreements based upon national skill standards, external program certification, or accreditation requirements.
- D.** The curriculum alignment committees will consist of five experienced community college teachers, five experienced high school teachers, one community college program curriculum specialist, and one public school curriculum specialist. The number of participants may be modified under special considerations. Criteria to award college credit for identified high school courses must be simple and uniform for all career technical areas.
- E.** The state offices of NCDPI and NCCCS will monitor the number of articulated students, their progression rate, and their progress toward graduation, employment and/or transfer to postsecondary institutions.
- F.** For credit to be awarded in any individual course, all criteria of the Commission on College, Southern Association of Colleges and Schools (SACS) must be met.
- G.** Guidelines will be monitored on an as needed basis.

COMPONENTS

IDENTIFICATION AND ALIGNMENT OF COURSES TO BE ARTICULATED IN THE FUTURE

The curriculum alignment committees will use the following procedures to identify courses for articulation:

1. Review high school and community college course descriptions.
2. Review high school course blueprints and community college course outlines to compare competencies.
3. Review existing local articulation agreements.
4. Determine if articulation is course to course, courses to course, courses to courses, or course to courses, and if competencies are similar.
5. Follow policies and regulations of licensing/accrediting bodies.

CRITERIA TO AWARD COLLEGE CREDIT

The following criteria will be used to award college credit for identified high school courses:

1. Grade of **B** or higher in the course, and;
2. A raw score of **80** or higher on the standardized VoCATS post-assessment.

To receive articulated credit, students must enroll at the community college within **two** years of their high school graduation date.

PROCESS TO DOCUMENT CREDIT

The official high school transcript and all official standardized VoCATS post-assessment scores will be required to verify that the criteria to award credit for articulated course work has been met. Where indicated, students will submit supporting documentation to the community college.

Community college officials will have the responsibility for verifying eligibility and acceptance of the articulated course or courses on the high school transcript for college credit.

A technical committee will be appointed to determine how articulated courses and corresponding VoCATS scores will be reflected on the high school electronic transcript in order to make the transition from high school to community college more efficient. This committee will be comprised of NCDPI and NCCCS information system personnel and representatives from local schools and colleges.

PROCESS OF EVALUATION

The following elements will be considered in the evaluation:

1. Evaluate the criteria for awarding credit (grade of B or higher in the course and a raw score of 80 or higher on the standardized VoCATS post-assessment) to ensure student success in the subsequent course(s) at the community college.
2. Evaluate the process to document credit from high school to the community college.
3. Review the Recommended Course List for course additions and deletions to insure the Recommended Course List reflects current curricula.
4. Measure use of the NC High School to Community College Articulation Agreement to include the number of students receiving articulation credit, number of articulated credits earned, cost savings to students, and graduation rates of College Tech Prep students.
5. A technical committee will be appointed to determine how the above data elements may be collected annually utilizing the NCDPI and NCCCS information management systems. This committee will be comprised of NCDPI and NCCCS staff and information systems personnel.

MATRIX OF EVALUATION ELEMENTS

Evaluation Element	Responsible Party	Method for Evaluation	Time Element
Evaluate the criteria for awarding credit to ensure student success in the subsequent course(s) at the community college	NCDPI & NCCCS Staff	Computer assessment and survey to review success rate of students in classes subsequent to articulated classes	Annually
Evaluate the process to document credit from high school to the community college	NCDPI & NCCCS Staff	Survey of college registrars, counselors, admissions officers, high school counselors, and SIMS operators	Every 3 years
Review of the Recommended Course List for course additions and deletions to insure the Recommended Course List reflects current curricula	NCDPI & NCCCS Staff	Administrative Review Curriculum Alignment Committee Meetings (as needed/requested)	Annually As requested
Measure use of the <i>NC High School to Community College Articulation Agreement</i> to include the number of students earning articulation credit, number of students awarded articulation credit, cost savings to students, and graduation rates of College Tech Prep students	Community College Information Systems Personnel Associate Director for Tech Prep NCCCS	Computer Assessment Survey	Annually

Gayle Kabes	President/Facilitator	Kabes and Associates, Inc.
Phillis Ostheim	President/Facilitator	True Vine Associates, Inc.

APPENDIX B

Curriculum Review Teams determined that the following course competencies aligned. These community college courses appear on the approved *Comprehensive Articulation Agreement between the North Carolina University System and the North Carolina Community College System* and therefore are **NOT** included in this Agreement. Local community colleges and local educational units may consider these courses for inclusion on local articulation agreements.
