

Social

Social people like to work with people – to inform, enlighten, help, train, develop, or cure them, or are skilled with words.

I am *Social* if:

- I like to do things where I can help people: like teaching, first aid, or giving information.
- Compared to persons my age, I am good at teaching, counseling, nursing, or giving information.
- I value helping people and solving social problems.
- I am helpful, friendly, and trustworthy.

Social people seem to satisfy their needs in teaching or helping situations. In contrast to investigative and realistic people, social types tend to seek close interpersonal relationships and are less likely to engage in intellectual or extensive physical activity.

Social
