

# Artistic

*Artistic* people have artistic, innovating, or intuitional abilities, and like to work in unstructured situations, using their imagination or creativity.

## I am *Artistic* if:

- I like to do creative activities like art, drama, crafts, dance, music, or creative writing.
- Compared to others my age, I have good artistic abilities in creative writing, drama, crafts, music, or art.
- I value the creative arts like drama, music, art, or the works of creative writers.
- I am artistic, imaginative, original, and independent.

*Artistic* people value self-expression and relationships with others through artistic expression. They dislike structure, prefer tasks involving personal or physical skills, and are more expressive of emotion than others. Artistic people are like investigative people, but are more interested in the cultural-aesthetic than the scientific.

# Artistic
